

Flower Bed Fairy Clothespin Ornament

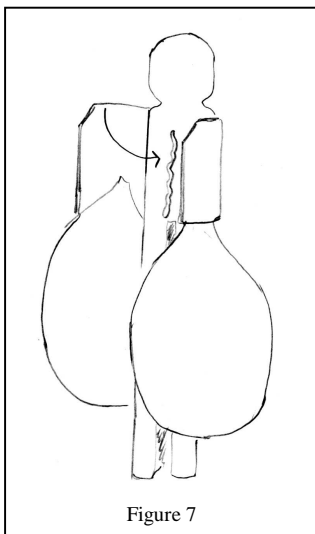

- 1) Paint the entire clothespin flesh color and let it dry.
- 2) Using pattern 1 from the patterns page, cut the wings from the gold mesh.
- 3) Cut a piece of pink chenille stem 5 inches long. Bend it in half first, then bend it into the shape of the top of the wings as seen in pattern 1.
- 4) Use a thin line of glue along the entire length of the chenille stem and glue it to the top of the wings.
- 5) Cut a piece of 1/8 inch pink hanging ribbon 12 inches long. Glue the ends on the back of the clothespin just below the neck. See figure 1.
- 6) Use pattern 2 from the patterns sheet to cut a vest from the pink felt. Cut a rectangle 2 1/4 inches by 1 inch and cut the top two corners off.

7) Glue 3 or four rose petals along the vest as seen in figure 2. Let it dry.

8) Cut two pieces of pink felt one and a half inches by one half inch and glue them around the bottom of each leg for boots. Use pattern 5 from the patterns sheet.

9) Place glue all the way around the body-part of the clothespin and in the front as seen in figure 7. Wrap the vest and rose petals around the body. Make sure that the side of the vest with the rose petals glued to it is against the clothespin so the rose petals become glued under the vest, not on the outside. Hold it in the front until it dries. You may want to use wax paper to hold the felt so it will not stick to your fingers. Let it dry.

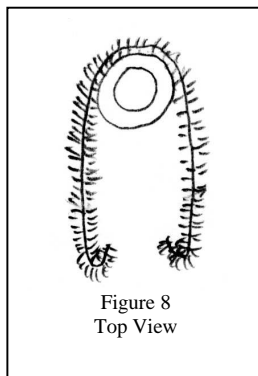

10) Cut a piece of pink chenille stem 4 inches long and bend the ends over to form hands as seen in figure 8.

11) Bend the chenille stem around the back of the Fairy so the arms are facing straight out in front. See figure 8.

12) Place glue on the back of the clothespin between the shoulders, just below the neck and glue the arms in place.

13) Roll the red-brown doll hair up into a tight ball in the palm of your hand. It may be easier if you get your palm wet first. Pull the

ball of hair into a pancake shape about the size of a quarter. Cover the top and back of the head with glue and hold the hair in place until it dries enough to hold then let it sit to dry all the way. See figure 9.

14) Glue the flower sequin to the hair to one side as seen in figure 9.

15) Glue the wings to the back of the Fairy. The pink chenille stem should be in the front. Glue the tip of the "v" just under the arms on the back of the Fairy.

16) Cut a piece of pink ribbon around the waist. Make a bow on the side as seen in figure 9.

17) Glue two red seed beads to the front of the vest for buttons, glue on the eyes and draw a mouth with a fine felt tip pen. See figure 9.
